Quadrant Communications

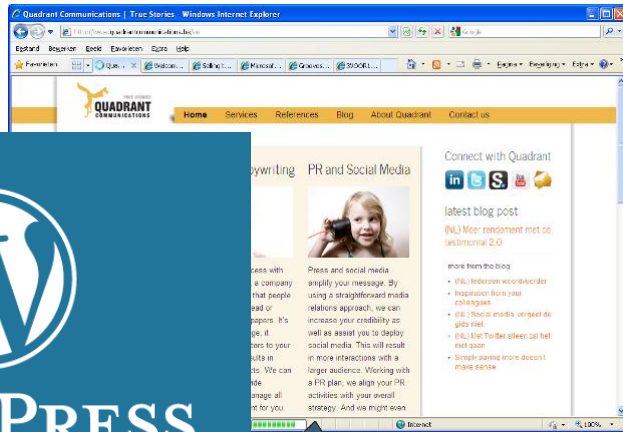

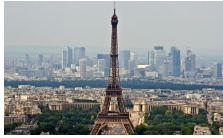

Coming up: all kinds of threats...

But first: the benefits!

1. They can find you easily

Virginia B... • If you harden your desktop OS properly they should not be able to download any unauthorized files or access un-authorized websites.

You might however wish to deploy temporal controls so that during their brakes they can listen to music or browse the web during their lunch hour.

Configure your browser's filters to only display tested and safe sites.
